

# GET THE MENTAL HEALTH DISABILITY RATING YOU DESERVE.

Many veterans are underrated for mental health, either due to an ineffective evaluation when they were first exiting the military or due to the veteran not feeling comfortable sharing the severity of their symptoms.

Because veterans are underrated, they don't receive the **compensation** and support they deserve.

## WHAT WE OFFER

**We connect veterans with experienced psychologists who provide high-quality evidence for the veteran's VA mental health claim.**

**Experienced Psychologists.** Our psychologists are doctoral-level licensed clinicians with experience conducting comprehensive mental health assessments.

**High-Quality Evidence.** Our psychologists ask the right questions and use the best tools to capture the evidence needed by the VA. Once you receive your documents, you will have what you need to support your claim.

**Affordable Without Compromising Quality.** Our remote, tech-enabled approach allows us to provide high-quality evidence at a fraction of the cost with a **flat, upfront fee**.

## OUR SERVICES

### Rating Increase - Disability Benefits Questionnaire

- Capture your symptoms
- Confirm diagnosis
- Recommend rating based on VA criteria

### In Depth Evaluation - Independent Medical Opinion

- Mental health assessment
- In depth review of symptoms
- Review of symptom progression over time
- Identify appropriate diagnosis
- **Nexus statement**
- Recommend rating based on VA criteria
